

EQUIP FOR FUTURE

Artios Consulting won't simply pack up once we've helped solve the problem at hand. When we conclude our assignment, leaders of a senior living community will have gained the knowledge and skills to maintain a well-managed operation. We get it done—and we ensure that senior staff members are confident they can get it done, too.

Key services include

- Providing digital tools or developing them to provide accurate and transparent reports that inform decision-making
- Training staff members how to use these tools
- Educating appropriate team members on initiatives and deliverables
- Reviewing with board members their legal responsibilities for governance including risk management, fiduciary duties and meeting performance goals
- Creating a culture of rapport with residents, their families and POAs, and staff members
- Monitoring performance goals by department

To discuss your community's specific needs, please contact Gigi Walker.
